Call Money Rates Are Firmer, but Exchange Is Weak.

A MATERIAL DECLINE. 1

British Victories in South Africa Has a Sentimental Influence on Trading.

Wall Street Oct. 23. The improvement in the stock market which began last week was more positive and substantial to-day than heretofore. The Jubilation in England over the British victories in South Africa, which has made all of the speculative shares traded in there most decidedly buoyant, has apparently a sentimental influence upon the local trading. 1 A more tangible influence, however, was 12 the liberal drawing of commercial bills of exchange by local bankers, which caused a further decline in rates of %c. for actual cables, %c. for sight, and %c. for sixty-day bills. Money was fairly firm, it being evident that the flow to the interior had not entirely stopped, the demand coming principally from the South, where the lack of ocean freight room for the shipment of cotton is having its effect. It is quite likely that call loans will be maintained at about per cent for some weeks, but as this will be due catirely to prosperous business conditions it should not have a depressing influence upon the stock market.

Activity in securities was very generally distributed, with a rising tendency in practically every group of securities. The herter class of raffway stocks were, perhaps, in more legitimate demand, but the strength of the market fright-ned the bears who were short of industrial shares, buying for the purpose of covering outstanding con-tracts being one of the principal causes for the rise in this class of stocks. United States Leather common provided one-sixth of the day's trading, closing with a net

of the day's trading, closing with a net by no of 3%, at 19%. Leather preferred followed hard after, gaining 3½, to \$1, though the assuming the directions. American Sugar was inclined to be erraited in its movements, being the first of the active stocks to advance materially, and with the exception of Brooklyn the only one to decline from earlier high quotations. Sugar soid up at one time to 152½, closing with a net gain of 1½, at 151.

Professionals were entirely in control of the movements of Brooklyn Rapid Transit. The bears, while forced to cover occasionally in this stock, as frequently attack it with easonable success. The shorts were queezed to day by an opposing clique of refessional traders, this covering causing net advance of 2½, to 86%. Other notate gains were in American Tobacco, derail Steel issues, General Electric ocking Valley issues, Louisville & Nashle, Manhantan, Metropolitan, New York atrail. CONDITIONS STEADILY IMPROVING.

The avowed policy of the Bank of England to leave this market undisturbed by withdrawals of gold from here is one of the prime causes for the confident feeling shown in many quarters of the market. There has been no change in general conditions, except that they are becoming more favorable week by week. No recent report of railway earnings can compare with the New York Central's statement for the past quarter, during which the road earned at the rate of 10 per cent on its capitalization. Money stringency may hold the market in check, but the tendency is certainly upward for the better class of securities, and for abundant reason.

The following are the sales of bonds, expressed in \$1,000s, and the range of prices:
